

SEMINAR ANNOUNCEMENT

"Summer Training Program at University of Utah" Summer 1436/2015

Dr. Hosam Hegazy

*Associate Professor
Physics department, Jazan University*

Wednesday, 28 Oct 2015, 11-12 PM, ROOM No. 2308

This seminar aims to present the logistics, facilitation and students experience during this year summer training program at the University Of Utah (UOU) and present the challenges as well. The program designed to include a scientific training to emphasis the research ethos among the students and a language education to improve their English language skills.

The scientific training part of the program conducted in the Department of Physics and Astronomy, and the language education in the English Language Institute (ELI) at UOU. The scientific program covers attending classes and laboratories training in different topics such as Particle Physics and Laser Physics besides they engaged in practical training in large facilities such as Delta Telescope array, laser facilities, and machine shop training. The students engaged the Scanning Electron Microscope Lab. to learn how to prepare and analyze materials. In ELI, the students were enrolled on intensive English course for overseas students.

Organized by

Physics Department, Faculty of Science, Jazan University
