Course Description:
This course basically deals with the theory and practice of Financial Accounting used in business organizations. It aims to develop better understanding about financial accounting.

Objective
This course aims at familiarize the students with the nuts and bolts of accounting. This paper will cover the practical aspect of Accounting.

Learning Outcomes:
After going through this course, the students are expected to develop a better understanding about financial accounting and develop base for the other specialized subject.

Skills to be developed throughout the Course:
Students will develop their analytical and oral communication skills via case study work carried out in seminar sessions. Information technology and written communication skills will be developed when completing the written assignment which will also test student’s creative skills and their abilities to present theoretical information in practical situations. Students are encouraged to make use of IT facilities particularly web sites to support research and reading.
